LABS Inc. Opens New Regional Testing Facilities in Philadelphia and St. Louis

*Premier testing facility to provide critical, time-sensitive donor suitability
and eligibility testing for regional customers*

Centennial, Colorado (July 10, 2008) – LABS Inc., one of the premier transplant reference and consultative laboratories in the country, today announced the opening of two new facilities located in St. Louis, MO and Philadelphia, PA. The new facilities will offer the full-range of infectious disease testing for transplant organizations in these regions. By opening these laboratories, LABS Inc. now allows local and regional Organ Procurement Organizations, eye and tissue banks and reproductive banks to receive vital donor suitability and eligibility testing and results back within a critical window of time.

LABS Inc. has been serving the transplant community for more than 25 years in the areas of infectious disease, immunogenetics and microbiology bringing unparalleled consultative and regulatory expertise to its' customers. The company has earned a reputation as an industry leader through a strong track record of quality and accurate testing, the use of cutting-edge technology for new, timelier and more accurate tests and its unsurpassed, hands-on service.

“LABS Inc. is committed to meeting the needs of the transplant community to help improve the safety and efficiency of all testing for organ and tissue transplants,” said Elizabeth Hearty, Chief Executive Officer of LABS Inc. “Expanding our offerings to organizations in the Midwest and Northeast will allow thousands more patients to receive the safest possible transplant outcomes.”

In an effort to best serve the transplant community from coast to coast, LABS Inc. plans to open additional regional centers as part of its strategic growth plan.
